

Northwest PGHAN Network

Alder Hey Children's Hospital Paediatric Gastroenterology Department presents

Implementing the RCPCH and BSPGHAN Quality Standards for Paediatric Gastroenterology, Hepatology and Nutrition in the Northwest – the Presence and Future in Collaboration

6th June 2018

The Research & Education Institute in the Park – Alder Hey Hospital

Dear Colleague,

We are writing to invite you to attend or send representatives from your hospital to this new education and networking initiative.

Our multidisciplinary paediatric gastroenterology, hepatology and nutrition (PGHAN) team is fortunate to work in the new Alder Hey in the Park with its innovative architecture and state-of-the-art clinical and data infrastructures, education and research facilities.

Northwest PGHAN Network and Training Days aim to provide a regular forum for clinical updates, shared policies and shared clinical management. They are an essential opportunity to liaise with other health professionals in improving the health and well-being of the children and families under our care and implementing gradually national quality standards as outlined in the joined RCPCH and BSPGHAN statement 2017.

We are keen to establish the Alder Hey PGHAN network and education days with as many as possible members from our referring and collaborating district hospitals in the Northwest, North Wales and Isle of Man to support this initiative.

Alder Hey Northwest PGHAN Network and Training Days will be the key activity to formally develop our PGHAN network in the North West but also be open to trainee doctors, clinicians and Associate Specialists from throughout the UK. The meeting format will include:

- Developing shared care protocols and pathways
- Clinical updates
- Clinical case presentations and discussions with Q&A
- What's new in research and research skills

The day will be structured to maximise opportunities for networking by inviting presentations from colleagues within the region as well as expert speakers.

Implementing the RCPCH and BSPGHAN Quality Standards for Paediatric Gastroenterology, Hepatology and Nutrition in the Northwest – the Presence and Future in Collaboration

Pathways and policies :

We also invite you to submit pathways and policies to be selected for oral presentation in the MDT discussion. Max: 8mins/10 slides

Submission deadline 20/5/18 email to marcus.auth@alderhey.nhs.uk

“RCPCH CPD approval applied for”

We plan to hold **Northwest network Days** quarterly initially in the Institute in the Park adjacent to the new Hospital with more study days to follow in 2018-2019.

We aim to take the network days in to the different regions within the Northwest. Please contact for further information.

Dr Marcus Auth, Consultant Paediatric Gastroenterologist
Northwest PGHAN Network Lead
