

South West regional paediatric parenteral nutrition study day

Wed 7th March 2018

Taunton Rugby Club, Hyde Lane, Taunton, TA2 8BU

Aim

The aim of this study day is to share experience of the management of children dependent on home parenteral nutrition (PN)

Objectives

Delegates will be familiar with:

- The types of patients who are dependent on PN and differences in their management
- What happens in hospital prior to discharge
- The impact of Home PN on family life
- How to manage specific situations – eg central line infection, electrolyte disturbance

Registration

Please register in advance by emailing alison.boswell@uhbristol.nhs.uk before 23rd Feb 2018

Delegates are welcome to bring cases or situations they have found challenging for discussion in the afternoon session.

This is a multi-disciplinary meeting. Anyone involved in the management of children at home on PN is welcome to attend. This includes doctors, nurses, dietitians, pharmacists, those that work in the community or those that work in hospital.

This meeting is free of charge to delegates including refreshments and buffet lunch thanks to our sponsors:
