Sheffield Transition Conference

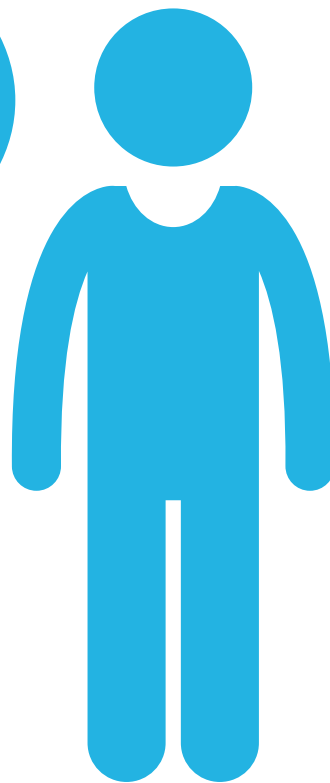

Increase your knowledge on transition and adolescent health care by attending our free one day virtual conference. Open to all professionals.

What does transition mean to you?

Transition to me is the moving from paediatric to an adult hospital, it is about getting to know the teams from both sides.

What made it a positive experience?

The communication from staff between everyone involved and I felt listened to, gave me relevant information

How was your transition?

My transition was very smooth, well planned and had good communication because the adult team came over to paediatrics and it was a gradual process making sure I was comfy being around them.

What do you think it would have been like if your transition hadn't been planned carefully?

Chaos and torture, I wouldn't know what I was meant to be doing and I think it would have failed.

Otilie Harwood-Gray, Age 20
Youth Forum

Hosted by Sheffield Children's NHS Foundation Trust
